

Assignment 26.1: Government Services Portal

Develop a **3-page Government Services Portal** using **HTML, CSS, JavaScript, and PHP**.

Pages

1. **Home Page – index.html**
 - Government portal title and navigation
 - Welcome section
 - Popular government services
 - Buttons with JavaScript alert()
2. **Services Page – services.html**
 - Display at least **6 government services**
 - Service description and required documents
 - **Apply Now** buttons linking to the application page
3. **Application Page – apply.php**
 - Create a government service application form
 - Include: Name, NIC, DOB, Gender, Email, Phone, Address, Service, District, Document and Comments
 - Use **PHP form handling** with POST
 - Create and use PHP functions for input validation/processing
 - Display submitted application details and a reference number

JavaScript Requirements

- Form validation
- alert() message
- confirm() popup before submission
- Help popup
- Reset confirmation
- Print button

CSS Requirements

- Create a separate style.css
- Style the navigation, cards, form, buttons, messages and footer
- Apply basic responsive design

File Structure

```
government-portal/  
├── index.html  
├── services.html  
├── apply.php  
├── style.css  
└── script.js
```
